

Plants for difficult to handle bulk materials

Maxau, Germany YEAR OF CONSTRUCTION 2009

DESCRIPTION

The internal fuel system feeds a CFB that has a thermic power of 157 MW with recycled waste wood, biomass, bark, fibre residue and bio sludge and surrogate fuels.

TECHNICAL DATA

- > bulk material
waste wood | paper fibre residue/bio sludge | surrogate fuels (EBS,RDF)
- > silo
100 m³ | 50 m³ | 50 m³
- > silo diameter
5,300 mm | 4,000 mm | 4,000 mm
- > discharge unit
rotating screw | rotor discharge system | rotor discharge system
- > discharge efficiency
2 x 250 m³/h | 55 m³/h | 40 m³/h
- > conveying technique
transport and dosing screw | chain conveyor | rotary valves
