

# Plants for difficult to handle bulk materials

## McComb/MS, USA YEAR OF CONSTRUCTION 2014

### DESCRIPTION

For a bolted steel silo with a closed substructure, SHW has delivered a rotating screw to feed the stored dry southern pine shavings to the boiler system within a saw mill.

### TECHNICAL DATA

- > bulk material  
dry southern yellow pine shavings & sawdust
- > silo  
680 m<sup>3</sup> (24,000 ft<sup>3</sup>)
- > silo dimensions  
Ø 8,150 mm (26.8 ft)
- > discharge unit  
rotating screw
- > discharge efficiency  
120 m<sup>3</sup>/h (4,273 ft<sup>3</sup>/h)
